

FLEET, FUEL & EV MANAGEMENT SOFTWARE

The only platform that manages your fleet and your fuel.

Fleet maintenance, bulk fuel, private fuel sites, EV charging, and fuel cards, all connected in one Fleet Operating System. Built for organizations that need every part of their operation working together.

Gallons Transacted Annually

THE DISCONNECT

Managing a fleet shouldn't require five logins.

Telematics here. Fuel cards there. Tank gauges, work orders, bulk fuel, chargers, each in its own tool. The data never meets, so your team pays the price.

OUR SOLUTION

Five modules. One platform.

Every capability is part of the same system, not a separate product to bolt on. Turn on what your fleet needs today and add the rest as you grow.

FLEET

Streamline fleet maintenance operations.

FUEL SITES

Easy management and transactional transparency.

BULK FUEL

Efficient bulk fuel supply solutions.

FUEL CARDS

Manage onsite and offsite fuel transactions.

EV

Real-time monitoring of your EV charging stations.

Save Time

Eliminate manual processes and duplicate data entry by managing fuel, fleet, and EV operations from a single platform.

Make Better Decisions

EKOS brings fuel, fleet, and EV data together in one platform, helping your team make faster and more informed decisions.

Reduce Costs

Replace multiple software subscriptions, vendors, and integrations with a single connected platform.

INTEGRATIONS

WEX, Samsara, Geotab, Motive, QuickBooks, and 40+ more. Plug EKOS into your existing stack on day one.

Fleet maintenance software that prevents the breakdown before it happens.

Full lifecycle management for every vehicle and asset. Preventative maintenance schedules by mileage, hours, or date, with work orders built in.

OPERATIONS & INSIGHTS

Asset Management

Full lifecycle for every vehicle.

GPS & Telematics

Live location, idle time, and routes.

Inspections

DVIRs and pre/post trip workflows.

MAINTENANCE

Preventive Maintenance

Schedules by mileage, hours, or date.

Garage Management

Bay scheduling and labor tracking.

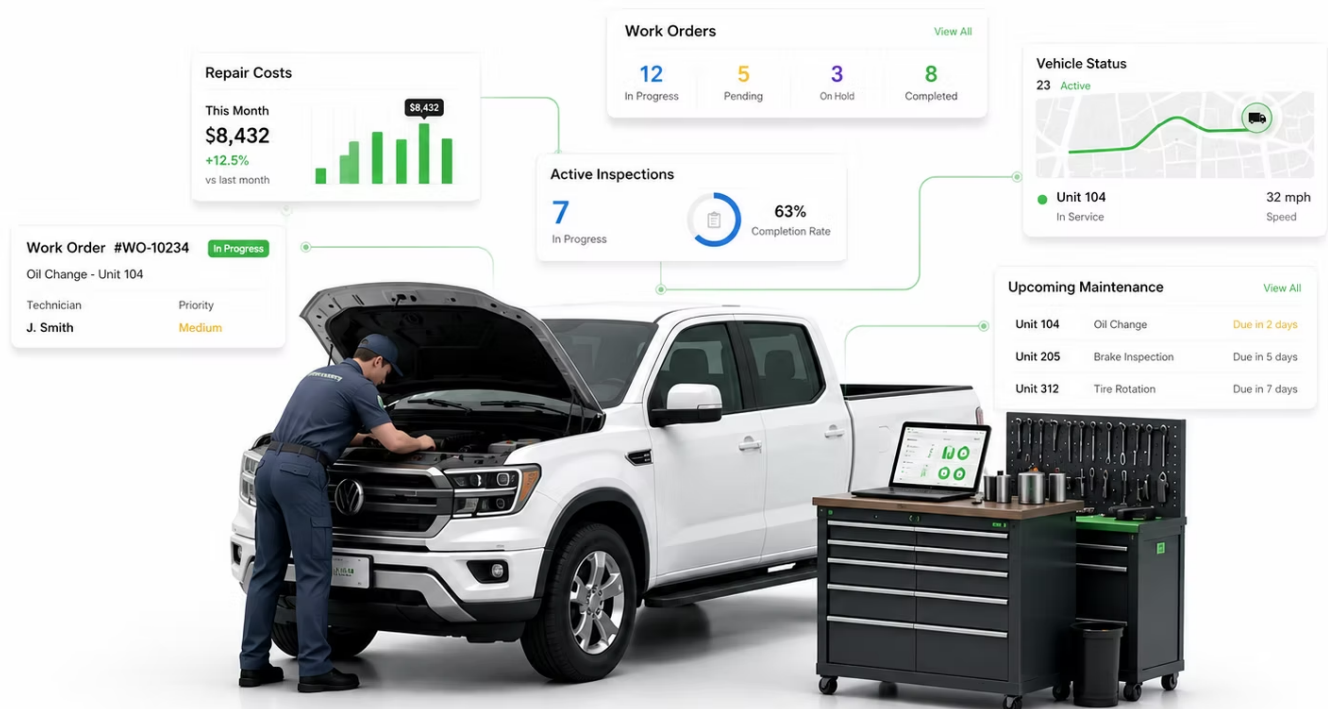

Work Orders

Assign, track, and close repairs.

Parts & Inventory

Stock, reorder, and barcode lookup.

Private fuel site monitoring with live equipment status across every site.

Monitor every tank, pump, and alarm in one place. Real-time tank gauging and leak detection across every site, in one view.

OPERATIONS

Fuel Authorization Control

Control who can fuel at your locations.

Inventory Reconciliation

Automated daily reconciliation on every tank.

Transaction Reporting

Track transactions from your equipment into EKOS.

Alarms & Diagnostics

Real time alerts from your critical fuel systems.

MAINTENANCE

Environmental Compliance

Regulatory inspections and automated leak checks.

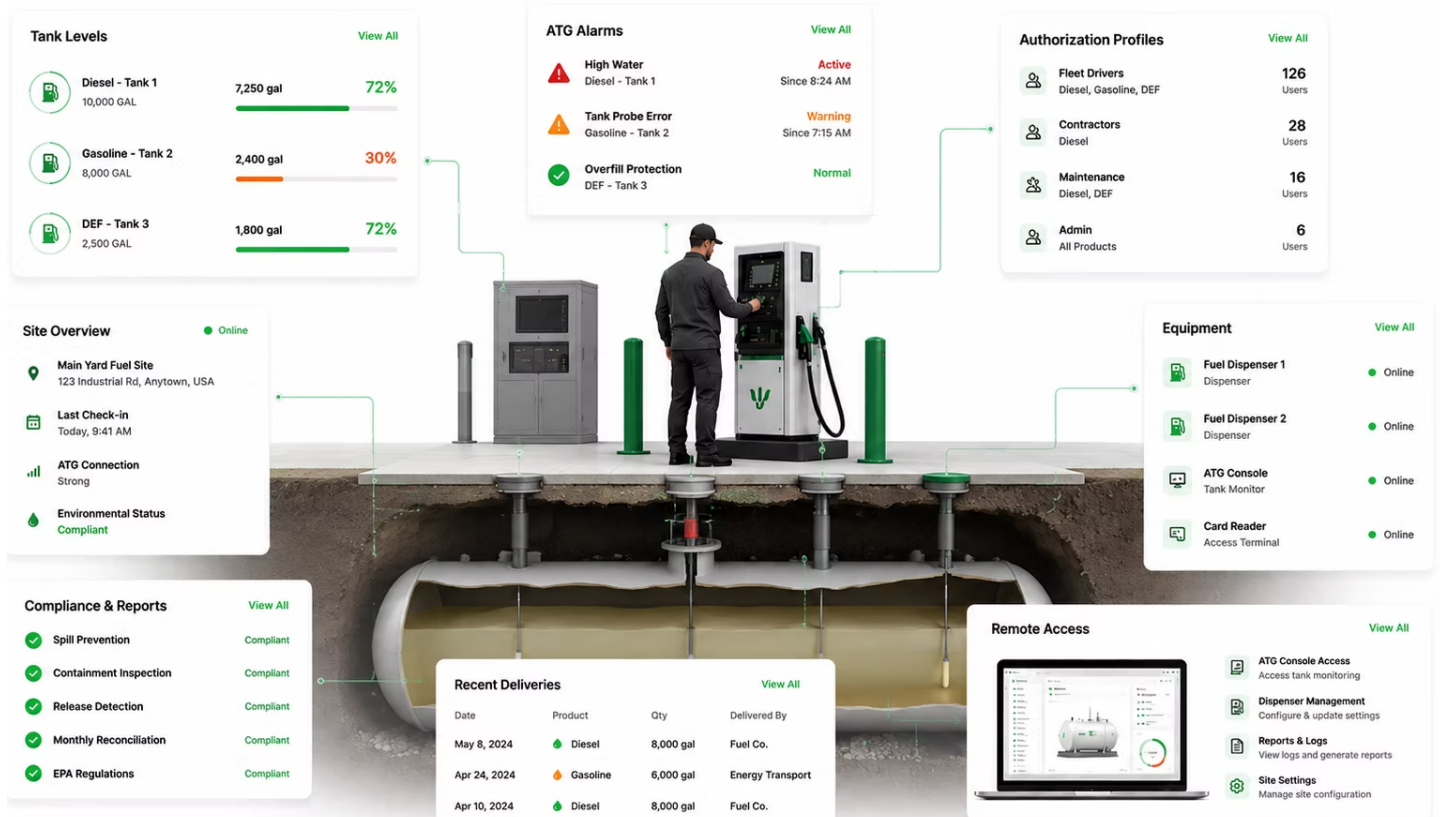

Service & Repair Management

Service workflow, cost, and age of equipment.

Site Management

Uptime, document storage, KPIs, and reporting.

Order, store, and reconcile every gallon.

How EKOS runs your entire bulk fuel program, end to end. Auto-match supplier invoices to delivered volume and flag discrepancies instantly.

OPERATIONS

Bulk Fuel Ordering

One-click reorders by site or tank.

Contract & Supplier Management

Track pricing tiers and supplier terms.

Market Intelligence & Price Benchmarking

Purchase fuel with confidence.

Data-Driven Ordering & Dispatch

Live tank levels and reorder thresholds.

FINANCE

Invoice Audit & Reconciliation

Auto-match invoices against deliveries.

Delivery Verification & Compliance

Centralize the entire delivery verification process.

WEX fleet card management with real-time spend controls.

Control off-site fuel spend with fully integrated cards. Sync cards and transactions automatically, set limits, lock cards, and catch fraud.

OPERATIONS

Card Management

Manage your entire fuel card lifecycle.

WEX Integration

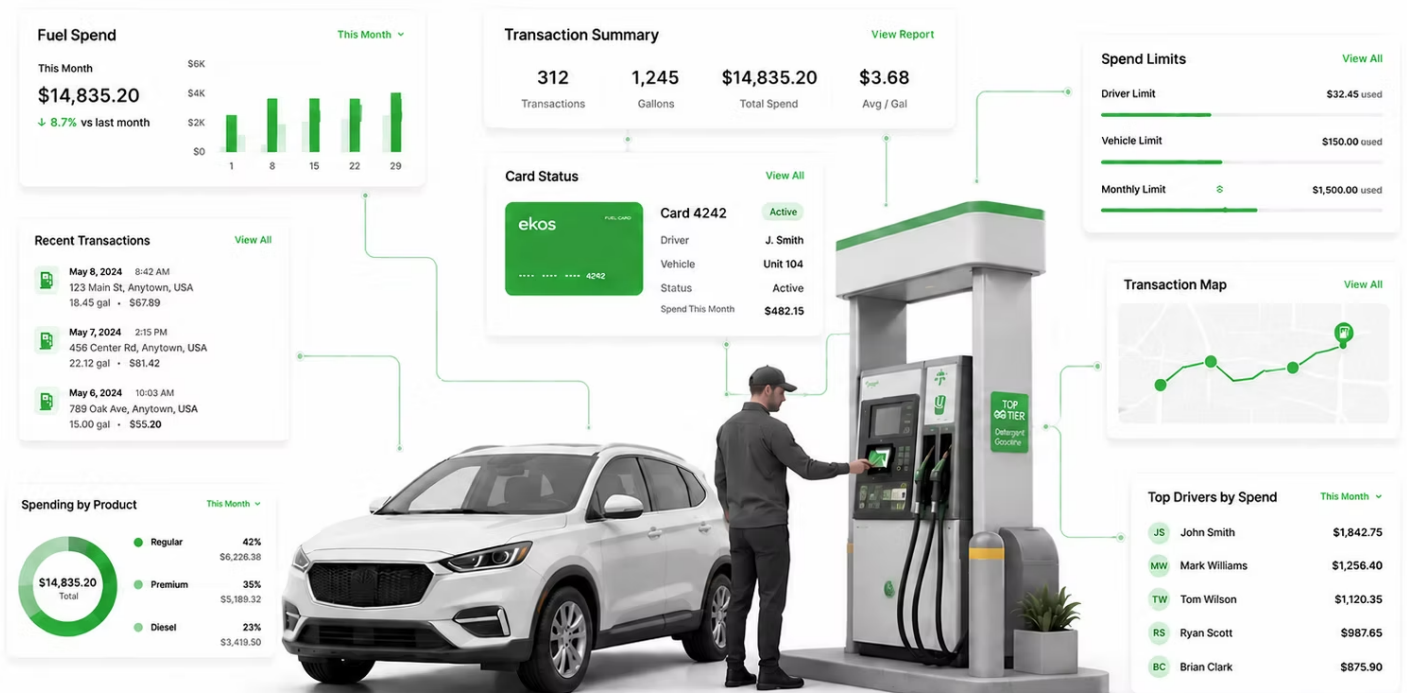

Sync cards and fuel data.

FINANCE

Off-Site Fuel Spend Management

Real-time spend monitoring.

EV charging management for fleets running diesel and electric side by side.

Manage charging and fuel side by side as you electrify. Track charging sessions and fuel alongside each other, in one platform.

OPERATIONS

Charging Sessions & Cost Analytics

Complete visibility into EV charging activity.

Charger Visibility

Centralized, real-time view.

MAINTENANCE

Charger Authorization

Complete control of who accesses your charging.

EKOS Charge & Home Charge

Reimburse employees easily.
